

## *Good For The Environment & Your Bottom Line!*

Water by  
**SiDEA**

*Water by SiDEA* is an eco-friendly water purification system....  
the “green” alternative to traditional bottled water.

The *Water by SiDEA* unit produces both chilled still & sparkling for your guest’s enjoyment and eliminates your need to order, store, refrigerate or dispose of traditional bottled water (*an option that is both detrimental to the environment and will become increasingly more expensive*).

*Water by SiDEA* provides you with a luxury bottle package for servicing purposes; the bottles are reusable, dishwasher safe and made from recyclable glass.

Best of all-- *Water by SiDEA* reduces your costs, pays for itself almost immediately and then becomes a revenue source.....*a major benefit in today's economy.*

### Impurities in drinking water have been shown to alter the taste of food & wine.

*Water by SiDEA* significantly reduces those impurities also eliminating the bad tastes and smells in tap water, therefore improving the taste of everything you serve to your guests.

Reduces your expenses as well as your carbon footprint & improve the taste of your food and beverages at the same time!

Starting from ordinary drinkable tap water the Naturizzatore system is able to transform it into water of really exceptional quality. Thanks to its two special filters, the device is able to eliminate bad tastes and smells that could possibly be present in drinking water, especially those caused by chlorine.

After the double filtration treatment, the water passes through a patented UV light disinfecting chamber for added protection, which is an outstanding feature provided by this equipment.
